GitHub — LinkedIn — Portfolio

Professional Summary

Computer Science and Engineering undergraduate with strong skills in Web Development, Application Development, Linux, Cloud Computing, AI-assisted development, and Cybersecurity. Proficient in Python, C, C++, JavaScript, HTML, CSS, Git, GitHub, and Linux. Passionate about building responsive web applications and secure software solutions. Seeking freelance and remote software development opportunities.

Education

B.Tech in Computer Science and Engineering
KMCT Institute of Technology and Management, Kuttippuram
APJ Abdul Kalam Technological University (KTU)
Expected Graduation: 2028 SGPA: 7.9/10

Skills

Languages: Python, C, C++, JavaScript

Web: HTML5, CSS3, Responsive Web Design

Tools: Git, GitHub, Linux, AI Tools

Cloud: Cloud Computing, Linux Administration

Cybersecurity: Shell Scripting, SSH, Network Reconnaissance, Git Forensics, Permission Analysis

Soft Skills: Communication, Teamwork, Problem Solving

Projects

Cloud-Based Virtual Machine Resource Monitoring System Live Demo

- Developed a cloud-based monitoring platform to track CPU, memory, storage, and network utilization of virtual machines in real time.
- Built interactive dashboards using Prometheus and Grafana for visualization and performance monitoring.
- Configured monitoring on Ubuntu Linux virtual machines deployed on AWS EC2.
- Implemented automated alerting and reporting for proactive resource management.
- Technologies: AWS EC2, Ubuntu Linux, Prometheus, Grafana, Docker, Python, Cloud Computing.

CloudVault – Secure Cloud File Storage cloudvault-self.vercel.app

- Developed a cloud-based file storage application with a responsive user interface.
- Integrated Amazon AWS S3 for secure file upload, storage, and retrieval.
- Used MongoDB to manage user information and file metadata.
- Built using HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, and AWS S3.

Loomi Website loomi-in.onrender.com

- Developed a responsive business website with a modern user interface and payment functionality.
- Optimized performance across desktop and mobile devices using modern web technologies.
- Leveraged AI-assisted development tools to improve development efficiency.

Mobile Application Project

- Developing a cross-platform mobile application focused on performance, usability, and user experience.

Linux Customization

- Customized Linux systems and explored open-source technologies.

Experience

Cloud Computing Internship (Ongoing)

Learning cloud infrastructure, deployment, networking, virtualization, and cloud security.

Certifications

- BreachLab Ghost Track (Completed)
- BreachLab Phantom Track (In Progress)
- Microsoft Certifications
- Coursera – Foundation of Coding
- Full Stack Development Certifications
